- (3) NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 11, T. 19N., R. 21E., M.D.M., at a point from which the west corner of Section 11 bears N. 22° 31' 09" W, a distance of 663 feet.

Item 15: Proposed Project Description

This application is filed to temporarily change a portion of Truckee River Decree Claim 603/604, proposed to be diverted from three separate new points of diversion on the Truckee River channel. The change is proposed to provide water for the irrigation of approximately 30 acres of riparian area to be extensively planted with trees, shrubs and grasses for rehabilitation of natural vegetation. As described by the supporting map, all three diversions will be located along the new river channel segment resulting from the recently constructed restoration project (one the south bank of the river channel, two on the north bank) for irrigation of a single contiguous area.

Water will be delivered and applied to the project site by installation of temporary pumps in the Truckee River channel and through surface-laid distribution pipelines with sprinkler systems.

The projected water use total from the three diversions will not exceed 100 acre-feet as allowed under Claim 603/604, for irrigation demand during the period allowed under provisions of the Truckee River Decree.

This represents a part of the Nature Conservancy's continuing restoration efforts at the Tracy project site, and to assist in the improvement of water quality in the Truckee River. This project is a cooperative effort of The Nature Conservancy, the City of Reno, and the University of Nevada, Reno. The water rights under Claim 603/604, which are the subject of this application, are a portion of the total of 350 acre-feet under Truckee River Decree Claims 603/604 allowed under lease by The Nature Conservancy for Truckee River restoration projects.
